A Message from Executive Director Lisa Kane

School’s in...and this can be a hectic time of year for the entire family.

While students struggle to get back into the swing of school, parents often face challenges related to re-establishing a school-year routine. One of the best ways to do this: Keep reading! Of course, there are many benefits to reading early and reading often: a better vocabulary, increased focus and stronger reasoning skills. But, as a mom and an educator, I know that one of the biggest benefits is what I call “book bonding time.”

Quite simply, reading brings parents and children together. A good story sparks imagination, discussion...and, if you’re lucky, laughter. In fact, one of the best things I discovered when reading to my boys was our shared sense of humor...Learning what made them laugh (and what didn’t) helped me ease their fears and allay their stress when things were uncertain... like when they returned to school each fall, for instance.

Make time to read. Find great books and a time that works best for you and your child—either early mornings before the day kicks in, or in the quiet part of the evenings—and get lost together in a great story. The time you take to experience the adventure of a new book together will provide quality time to talk, listen and soothe their early childhood transitions. Their childhood goes by fast...What better way to savor it than with a great book, side by side?

May your story be a happy one,
