

Let's Talk About Your Toilet

Today's throwaway society has created a huge and ugly monster in many of the sewer collection systems worldwide. Products that have been developed to add convenience to your daily routines have become a major problem for the wastewater industry. Just because a product says it is flushable does not mean it should be flushed into the sewer system. Sanitary sewer collection systems are designed to take away dirty water from sinks, baths, laundries, and toilets. Flushing unintended items into the sewer system can add to the cost of operating and maintaining your sewer collection system and treatment plant. Putting these items down the sewer system can cause blockages that could result in property and environmental damage.

The only thing that should be flushed into the sewer system is Pee, Poop, and Toilet paper.

DO NOT FLUSH:

Wipes of any kind!

Paper Towels	Disposable and Cloth Diapers	Feminine Products
Q-Tips	Bandages	Dental Floss
Hair	Medicines	Socks/Underwear
Incontinence Pads	Razor Blades	Pet Litter
